PROFESSIONAL SUMMARY

As a dedicated Data Science and AI student, I am passionate about using technology to solve real-world data challenges. I have built a solid foundation in Python, SQL, and Machine Learning through practical, hands-on projects. My most significant achievement so far is developing a Real-Time Social Media Fact Checker—an AI tool that uses Advanced NLP (DistilBERT) to detect misinformation in real time. I genuinely enjoy transforming messy data into clear, meaningful insights and am eager to tackle real-world challenges as a Data Scientist.

TECHNICAL SKILLS

- ✓ **Programming & Query:** Python, SQL (MySQL – Basics)
- ✓ **Data Science & AI:** Statistical Analysis, Data Wrangling, Predictive Modeling, Recommendation Systems
- ✓ **Machine Learning & Libraries:** Pandas, NumPy, Scikit-learn, Exploratory Data Analysis
- ✓ **Natural Language Processing (NLP):** Transformers (DistilBERT), PyTorch, Tokenization
- ✓ **Data Analysis & Visualization:** Excel, Power BI, IBM Cognos Analytics
- ✓ **Development & Tools:** Flask, Git & GitHub, VS Code, Jupyter Notebook, Google Collab

PROJECTS

Real-Time Social Media Fact Checker & Misinformation Detection System

- **Tech Stack:** Python, PyTorch, Transformers (DistilBERT), Flask, SQLite, NewsAPI.
- **Performance:** Achieved a tested accuracy of 94.36% and an F1-score of 94.34% using the DistilBERT transformer model.
- Fine-tuned a **DistilBERT** model for high-precision sequence classification and integrated it with a **Flask** web application.
- Implemented real-time news fetching using **NewsAPI**, allowing users to verify trending headlines instantly.
- Built an interactive dashboard with **Chart.js** to visualize prediction confidence and truth-to-fake ratios.

Movie Recommendation System

- **Tech Stack:** Python, Scikit-learn, Pandas, NumPy, Streamlit, TMDB API.
- Engineered an end-to-end recommendation engine using **Content-Based Filtering** (Cosine Similarity) to suggest movies based on user preferences.
- Built a highly interactive and responsive web interface using **Streamlit**, providing a seamless user experience.
- Developed a robust data pipeline for cleaning and preprocessing large-scale movie datasets using **Pandas and NumPy**.
- Integrated **TMDB API** to fetch and display real-time movie posters and trailers, enhancing the platform's visual appeal.

EDUCATION

- ❖ BCA Specialization in Data Science & AI, Babu Banarasi Das University, Lucknow (2023–26)
- ❖ Intermediate – UP Board (2022)
- ❖ High School – UP Board (2020)

CERTIFICATIONS

- ✓ Machine Learning with Python – IBM
- ✓ NoSQL and DBaaS – IBM
- ✓ IBM Cognos Analytics
- ✓ Data Science & Artificial Intelligence

LANGUAGES KNOWN

English, Hindi
